SPECIAL SHRUB OFFER!

Every home should have Plenty of Cherry Trees

**Buy all you need this Spring
while prices are so low**

These cherries are budded on the best quality Mazzard root-stocks obtainable. Mazzard roots are fibrous and greatly lessen transplanting losses. They are usually much higher priced.

PRICES

	Each	10	100
$\frac{11}{16}$ " and up, 5-7'	\$.60	\$5.00	\$35.00

$\frac{7}{16}$ - $\frac{9}{16}$ "40	3.00	15.00

Barnes Bros. Fruit Trees

Barnes Brothers has been producing fruit trees of high quality for more than 40 years. These trees are now grown on the best North Western understocks obtainable and carefully handled by skilled and experienced men. Raised in our difficult Northern climate, the trees succeed well in any part of the country.

We grade our fruit trees primarily by caliper, height being only approximate. This places many of our trees in the second grade which might be sold as first by those who grade only by height. We consider that this gives more satisfaction to you.

**All-season
CHERRY
COLLECTION**
6 CHOICE 3 TO 4 FT. \$1.48
CHERRY TREES Postpaid

2 Collections for \$2.75

2 Black Tartarian 3 Montmorency
1 Napoleon Bigarreau

Thus you get early, medium and late cherries—both sweet and sour—for almost two months. These trees are nicely branched and have wonderful roots.

If you want the same collection in our large selected trees, the price will be \$2.50 not postpaid for all 6 trees or 2 collections (12 trees) for \$1.75 not postpaid.

VARIETIES

Black Tartarian—A large purple-black, red fleshed cherry of excellent flavor. The most popular dark sweet cherry.

English Morello—Medium sized. Dark red. A very productive late sour cherry.

Governor Wood—Large, light yellow with red check. Sweet, Early. One of the best.

Montmorency—Light red. Midseason. Bears young. Largest, most productive and popular sour cherry.

Napoleon Bigarreau—A large yellow red checked, sweet cherry which follows Governor Wood.

Schmidt's Bigarreau—Large, black, late. Fine flavor. Bears abundantly.

Yellow Spanish—Pale yellow, red check. Flesh firm and delicious.

PLUMS

With reasonable care there is no fruit tree that will grow more vigorously or produce more freely than Plums. The trees when flowering in the spring are very beautiful and are worth planting for the blossoms alone. The Japanese varieties grow so fast and bear their large tasty fruits so heavily that they have a tendency to be shortlived. Plant a few trees

yearly. These European Plums may be grown farther north than the Japanese. Moreover, the fruit has a wider range of color and longer time of ripening.

Plum Tree Prices

	Each	10	100
$\frac{11}{16}$ " cal., 5-7'.....	\$.60	\$5.00	\$30.00
$\frac{9}{16}$ - $\frac{11}{16}$ " , 4-6'.....	.50	4.00	20.00
$\frac{7}{16}$ - $\frac{9}{16}$ " , 4-5'.....	.40	3.00	15.00

JAPANESE

Abundance—Red, yellow fleshed, of good quality. Fine for canning. August. Hardy and productive.

Burbank—Yellow, red blushed. August. Good keeper and shipper.

Red June—Vermillion red, yellow fleshed. Late July. Productive.

Satsuma—Purple-red, juicy and sweet. Late. Fine for canning.

Wickson—Large and heart-shaped. Amber yellow with red blush. Sweet. September. Not hardier than peach.

EUROPEAN

Fellemborg (French or Italian Prune)—Large. Oval in shape. Purple. Freestone. September.

German Prune—Very large, oval. Purple. Good quality. Sweet. One of the most popular for canning. September.

Imperial Gage—Greenish-yellow. Good quality. Freestone. August. Tree best adapted to sandy soils.

Lombard—Medium and round. Purple. Excellent quality. August. Best for culinary purposes.

Reine Claude—Greenish-yellow. Fair size. Semi-freestone.

FRUIT GROWERS . . . ATTENTION!

Buy your Peach Trees from Barnes Brothers and receive vigorous, well-grown trees with splendid roots.

All Peach Trees are stored in modern frost-proof cellars beyond the possibility of injury during the winter. We do not handle Peach Trees in any other manner.

PLANT HARDY NEW ENGLAND GROWN PLANT MATERIAL at "NEW DEAL" PRICES

Ornamental and Shade Trees

Approximate height of mature trees indicated.

Acer dasyarpum (Silver Maple)—100'. Very rapidly growing. Makes a graceful, spreading tree for lawns or parkways within a short time. 8-10', \$1.00; 10-12', \$1.75.

Acer d. Wieri (Wier's Cutleaf Maple)—80'. Distinguished by its gracefully drooping branches and delicately cut foliage. 8-10', \$1.25.

Acer platanoides (Norway Maple)—75'. A symmetrical tree with dense, rounded head. Valuable as a shade tree and for street planting. 6-8', \$1.50; 8-10', \$2.00; 10-12', \$3.00.

Acer saccharum (Sugar Maple)—80'. Excellent street or shade tree. Upright and dense. Leaves turn bright red and yellow in the fall. 6-8', \$1.50; 8-10', \$2.00; 10-12', \$3.00.

Betula alba (European White Birch)—40'. Slender and graceful with pendulous branches, bark white. 6-8', \$1.50; 8-10', \$2.00.

Catalpa bignonioides nana (Umbrella Catalpa)—8'. A straight, slim trunk with dense rounded head of large, heart-shaped leaves. For formal effects. 5-6', \$1.00.

Platanus orientalis (Oriental Plane)—75'. A very successful shade tree for street plantings as it is suited to a variety of soils, grows rapidly and is symmetrical in contour. Stands smoke and dirt and is remarkably free from insects and diseases. 6-8', \$1.00; 8-10', \$1.50.

Populus nigra italica (Lombardy Poplar)—100'. Slender, spire-like tree with upright branches. Very effective for high screens and vertical accents. 6-8', 75c; 8-10', \$1.00; 10-12', \$1.25.

Salix babylonica (Babylon Weeping Willow)—40'. Long, pendulous branches droop to the ground with matchless grace. They create exquisite effects beside water where they thrive. 6-8', \$1.50.

Salix pentandra (Laurel Willow)—30'. Dark, shiny green leaves. Fine for screens, seashore or other waterside plantings. 6-8', \$1.00.

Tilia americana (American Linden)—100'. Tall, rapidly growing tree. Excellent for lawns or parks. 8-10', \$2.00.

Ulmus americana (American Elm)—120'. New England's stately and graceful tree. Popular for street and park planting. 8-10', \$1.25.

Ulmus n. Moline (Moline Elm)—A straight conical tree. Very compact. Medium sized. A new form of Elm. 8-10', \$1.50; 10-12', \$2.50.

Ulmus pumila (Chinese Elm)—70'. Rapidly growing. Will thrive in dry soils and under adverse conditions. 6-8', \$1.00; 8-10', \$2.00.

TREES FOR FLOWERS AND FRUIT

Cercis canadensis (Red Bud)—In May, this tree is covered with dense masses of deep rose-pink flowers. A small tree with a broad round top and attractive on a lawn at all times. 4-5', \$1.25.

Cornus florida (White Flowering Dogwood)—The well-known White Dogwood. Flowers in spring. Splendid foliage dense enough to give shade in summer. Bright scarlet berries and red leaves in fall. One of the most ornamental trees for lawn plantings. Balled and Burlapped. 3-4', 90c; 4-5', \$1.25.

Cornus florida rubra (Red Flowering Dogwood)—Like above except for red flowers. Balled and Burlapped. 3-4', \$2.00; 4-5', \$2.50.

Crataegus oxyacantha coccinea (Paul's Double Scarlet Thorn)—Recommended for its rich, luxuriant foliage and double, deep scarlet flowers which come in late May. 4-5', \$1.75.

Koeleruterin paniculata (Varnish Tree)—30'. A charming lawn tree with long clusters of showy, golden yellow flowers in July. 4-5', \$1.50.

Malus Eleyi (Eley Flowering Crab)—15'. Flowers are a rich wine red, semi-double in abundant clusters. Young shoots and leaves are red. In autumn dark red fruits are brilliant. 4-5', \$1.00; 5-6', \$1.50.

Note: We have about 25 other varieties of Flowering Crabs but have selected this especially fine one to offer here. If you are interested in other named varieties write us.

Prunus pissardi (Purple Leaf Plum)—A small tree with pinkish white flowers and lustrous dark purple leaves which remain purple all the season. 5-6', \$1.00.

THE FLOWERING CHERRIES

Prunus japonica (Japan Flowering Cherry)—Double, bushy pink flowers in April followed by small red fruits. Heavy transplants 5-6', \$1.25.

Kanzan—One of the finest of all flowering cherries. Bright deep pink flowers, dark in bud and very double. A hardy and rapid grower. Heavy transplants 4-5', \$2.25.

Kofugen—Buds crimson. Flowers large, double deep old rose and very numerous. Tree symmetrical and vigorous. A fine variety for street or parkway plantings. Heavy transplants 4-5', \$2.25; 5-6', \$3.00.

Naden—Similar to above except that flowers are lighter pink. Heavy transplants 5-6', \$2.25.

Prunus subhirtella pendula (Rosebud Cherry)—One of the earliest and loveliest flowering cherries. Gracefully drooping branches are covered to their tips with bright, single, rose colored blossoms before the leaves appear. Standards 5-6', \$3.50.

Sorbus aucuparia (European Mt. Ash)—30'. A very attractive, small, hardy tree which bears clusters of orange-scarlet berries from July to winter. Birds like the fruits. 6-8', \$1.25; 8-10', \$1.75; 10-12', \$2.50.

Columnar Juniper

shown above). A tall, slender tree which naturally reaches a height of 15-20'. Very hardy and rapid growing. It is compact and formal, effective as a specimen, in doorstep plantings or as a vertical accent in landscape plantings. 2-3', \$1.50 each.

Canadian Hemlock

A Magnificent Specimen Tree
Tsuga canadensis (Canadian Hemlock)—(Illustrated lower left). This is one of the most adaptable and valuable trees for landscape uses as it will grow in sun or shade or on average soil, is beautiful whether sheared or allowed to grow naturally and retains good color throughout the year. Its pendulous branches give it rare grace. A rapid grower and very hardy. Unsurpassed for hedges. 2-2½', \$1.25; 3-3½', \$2.00; 4-5', \$3.00.

THE CANADIAN HEMLOCK

Pfitzer's Juniper

PEARS • ARE EASY TO GROW HARDY PRODUCTIVE

Here is a list of pears that will supply excellent fruit for market and home use from August well into the winter. Pears will grow on almost any good soil but thrive best in rather heavy loam or clay. Plant about 20' apart.

Bartlett—Most popular pear for home and market use. Fruit of fine quality and rich flavor. Tree vigorous. September.

Bourne Bosc—Very large, deep yellow, overspread with russet. Unsurpassed in quality and flavor. Juicy. October and November.

Beurre d'Anjou—An excellent market pear for late fall and early winter. Fruit yellow with faint blush. Uniform in size. Quality good.

Clapp's Favorite—Large, red blushed. Quality good. Early. Precedes Bartlett.

Duchess d'Angoulême—Extremely large pears of rich buttery flavor. October.

Keiffer—Large, yellow with red cheek. Excellent for cooking and canning. Tree bears young and is productive. October and November.

Seckel—Round, small russet colored pears. Fruit sweet and of finest quality. Tree productive and hardy. October.

Sheldon—Large, round, russet and red pears of first quality. September and October.

Bring New Beauty to Your Home with Climbing Roses

Here are 10 hardy climbing roses. We have selected 10 of the best of the new and old varieties to give a wide range of colors and blossoming seasons. 2 year, field grown, first size and quality.

Each, 50c; 10 year selection, \$4.00

American Pillar—Brilliant pink, white at center. Single. Late. Very vigorous. Flowers in large clusters. Excellent for cutting.

Dorothy Perkins—Small, double, shell pink flowers in clusters. Late. An old favorite, still popular.

Dorothy Perkins White—Like above except for color.

Dr. Huey—Large, semi-double. Deep, rich red of velvety texture. Mid-season.

Again we greet you with our Annual Spring Offerings. This folder may seem an abrupt departure from our preceding catalogs but you will find in it a selected list of the most desired and reliable plants. If there is any plant you want which is not listed we hope that you will write us as we have many others. There will be a second folder on Perennials with other new and rare plants.

Evergreens
For Year Around
Beauty and Cheerfulness

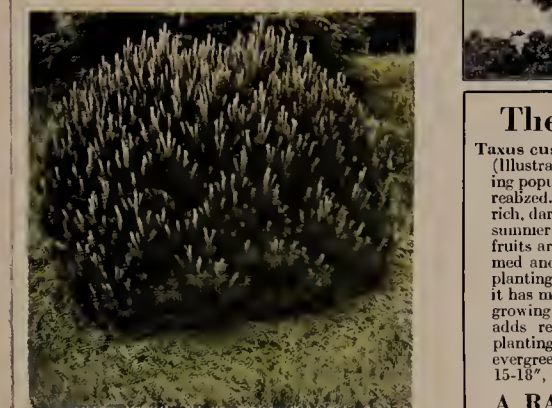

Don't forget to watch for this. It will contain information of value and interest.

There is No
Such Thing as a Cheap
Evergreen. Buy wisely & Save

Thuja occidentalis pyramidalis (Pyramidal Arborvitae) (at right)—Dense and compact as illustrated. Its rich green color is retained all winter. It is very hardy and uniform in habit reaching a mature height of 15-20'. It is excellent for hedges or specimens. 2-2½', 80c; 3-3½', \$1.25; 4-5', \$2.50.

Juniperus chinensis Pfitzeriana (Pfitzer's Juniper) (Lower left)—The popularity of this valuable evergreen is due entirely to its own merit. It will stand exposure to wind, sun or shade and is not particular as to soil. Hardly and dependable everywhere. Size, shape and color in illustration. Our plants are well shaped and transplanted many times. 15-18", 80c; 18-24", \$1.25.

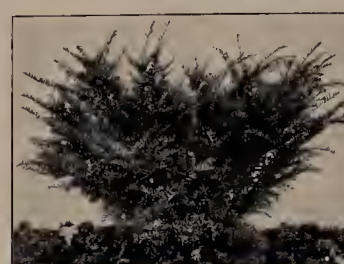

Pinus Montana Mughus (Mugho Pine) (Illustrated below)—Our Mugho Pines are true dwarfs, low, compact and cushion-like in growth. This is a very slow growing evergreen which does not need trimming and is especially good to use in the foreground of plantings. 12-15", 60c; 18-24", \$1.00.

Mugho Pine

Pyramidal Arborvitae

The Japanese Yew

Taxus cuspidata (Spreading Japanese Yew) (Illustrated above)—This is rapidly becoming popular as its sterling qualities are being realized. It has fine shiny foliage which is a rich, dark green through the year. From late summer to winter, bright scarlet berry-like fruits are most attractive. It is easily trimmed and due to its ability to stand varied planting conditions, including dense shade, it has many uses in the landscape. It is low growing and wide spreading and certainly adds refinement and distinction to any planting. A truly aristocratic member of evergreen's Royal Family. 12-15", 80c; 15-18", \$1.25.

A RARE OPPORTUNITY

SMALL FRUITS

Strawberries

The Home Garden is where they pay best. A few hundred plants well cared for, will produce an abundant supply and will prove a delight to the whole family.

Howard 17—Ripens early and continues a long time. Quality excellent. Well-known and widely planted. 100 for \$1.00; 1000 for \$8.00.

Mastodon—Fruit very large and of good quality. Everbearing. One of the most popular.

Champion—Medium size. Dark red. Prolific. Everbearing.

Mastodon and Champion 100 for \$2.00; 1000 for \$12.00.

Blackberries

Eldorado—The vines are vigorous, hardy and prolific. Berries are large, jet black and borne in large clusters, which ripen well together. Flavor is good. No hard core. Quality unsurpassed for home or market use. Midseason. 10 for 40c; 100 for \$3.50; 1000 for \$30.00.

Raspberries

Will Produce Fruit the First Season After Planting

Columbian—Purple. Berries very large and yield tremendous. 10 for 60c; 100 for \$5.00; 1000 for \$10.00.

Latham—Red. Large berries. Vigorous. Hardy. Prolific.

Plum Farmer—Black. Large. Firm. Early. Popular.

St. Regis—Red everbearing. Quality good. Size medium.

Prices 10 for 40c; 100 for \$3.50; 1000 for \$30.00

Grapes

Bear Quickly. Delicious and Useful.

Caco—Wine red. Sweet. Large. Compact bunches. Each, 50c; 10, \$2.50.

Concord—Blue-black. Well-known and popular. Each, 15c; 10, \$1.25; 100, \$8.00.

Niagara—White. Sweet. Large, compact bunches. Midseason. Each, 20c; 10, \$1.50.

Worden—Blue. Fine table grape. Ripens earlier than Concord. Each, 20c; 10, \$1.50.

Concord—Ever Popular

Dr. Van Fleet—Beautiful, pink buds and flowers, borne on individual stems. Midseason. Foliage excellent.

Jacotte—Large semi-double flowers of rich coppery yellows and oranges in clusters. Midseason. Strong, glossy foliage.

Mme. Gregoire Staechelin (Spanish Beauty)—Large, delicate pink flowers, borne singly on stems. Very hardy and vigorous. A beautiful new variety, destined for great popularity.

Paul's Scarlet—Large, bright, scarlet flowers in small clusters. Prolific. Early. Pillar type.

Primrose—Large, double, primrose-yellow, in clusters. Plant vigorous. Foliage rich and glossy. A most satisfactory yellow climber.

Silver Moon—Beautiful, large, nearly single flowers of pure white. Plant vigorous. Foliage excellent. Needs protection in climates of zero winters.

Paul's Scarlet

HARDY FLOWERING SHRUBS

We are Especially Proud of Our Shrubs

HOME OWNERS! Here is an opportunity to plant Barnes Brothers first class Ornamental Shrubs at real money saving prices. Our shrubs are fresh dug and covered by our liberal guarantee. They are the best that money can buy. First class shrubs can not be sold at lower prices.

Spend a few dollars and see what pleasure a well planted yard will give you.

And You will be Proud of Them About Your Home

Cornus alba sibirica (Red-branched Dogwood)

Attractive, medium sized shrub. Blue and white berries in the fall. Bright coral red stems in the winter. 2-3', 35c each.

Cotoneaster divaricata (Spreading Cotoneaster)—Upright spreading to 6'. Bright red fruits in September. 2-3', B. & B. 75c each.

Cydonia japonica (Japan Quince)—Scarlet flowers in early May followed by fragrant quince-like fruits. Dark glossy foliage. 18-21", 50c each.

Deutzia gracilis (Slender Deutzia)—Dense, bushy, dwarf shrub. Many, pure white flowers in May. 12-18", 35c each.

Deutzia gracilis (Slender Deutzia)—Dense, bushy, dwarf shrub. Many, pure white flowers in May. 12-18", 35c each.

Kolkwitzia amabilis (Chinese Beauty Bush)—A handsome shrub growing to about 8'. Foliage is fine and glossy. Branches slender, arching, covered with pink flowers in June. 2-3', 50c each.

Lepedeza formosa (Bush Clover)—A medium sized bushy plant with an abundance of rosy purple, pea-like flowers in mid-summer. One of the most outstanding shrubs in our Display Garden last year. 2-3', 50c each.

Excelsior grandiflora (Pearl Bush)—In early May, showy masses of large, pure white flowers are displayed on this dainty slender shrub. Grows upright to 10'. 2-3', 50c each.

Lonicera tatarica (Tartarian Honeysuckle)—A dense, vigorous shrub to 10'. Flowers in June. Red currant-like fruits in summer. We are offering white or pink flowered shrubs. 3-4', 50c each.

Philadelphus coronarius (Garland Mock Orange)—A fine old garden shrub which grows erectly to 10'. In May produces dense sprays of delightfully scented, creamy white flowers. 2-3', 35c each.

Philadelphus virginialis (Vigilant Mock Orange)—A magnificent upright shrub. Flowers white, double and semi-double. Fragrant. Long blooming period—8', 2-3', 50c each.

Prunus glandulosa (Flowering Almond)—Low shrub with arching branches which in spring are covered with double, pink flowers. An exquisite plant for front of border. 2-3', 75c each.

Prunus illoha (Double Flowering Plum)—A handsome shrub growing to 6'. In Spring before the leaves appear there is a profusion of delicate pink blossoms. Small, red plum-like fruits follow. 2-3', 50c each.

Rhodotypos kerrioides (Jet Bead)—Bears showy, white flowers in May. Shiny, jet black fruit lasts all winter. Very vigorous and hardy. 2-3', 35c each.

Spiraea Anthony Waterer—An old favorite among small garden shrubs. Flat clusters of bright rose-pink flowers last all summer. 18-24", 55c each.

Spiraea Henryi—A hardy vigorous grower with arching branches. White flowers borne in June from clusters 3-5' across. 2-3', 35c each.

Spiraea Thunbergii—In April and May its delicate arching branches bear fine bright green foliage and a profusion of white flowers. 2-3', 35c each.

Spiraea trichocarpa (Korean Bridal Wreath)—A handsome new shrub with flowers similar to *Spiraea Van Houttei* but two weeks later. 2-3', 35c each.

Spiraea Van Houttei—A popular and well-known medium size shrub. Covered in late May and June with pure white flowers. Foliage dark green and fine in texture. 2-3', 35c each.

Symphoricarpos racemosus (Snowberry)—This low plant bears pinkish white flowers in summer and large white berries in fall and winter. A superb, fine textured shrub for borders. Grows to 5' and doesn't mind shade. 2-3', 35c each.

Symphoricarpos vulgaris (Coral Berry)—A small shrub that thrives in shade. Its small pink clustered berries last until late winter. 2-3', 35c each.

Tartarian Honeysuckle (Lonicera)

Deutzia gracilis rosea—Similar to above except flowers are pink and plant is less dwarfed. 12-18", 35c each.

Deutzia scabra crenata—Strong and upright growing to 6'. Clusters of double white flowers in June. 2-3', 35c each.

Deutzia scabra Pride of Rochester—Earliest blooming of Deutzias. Large white double flowers tinted pink outside. 8'. Showy. 2-3', 35c each.

Forsythia intermedia (Golden Bell)—Earliest blooming and most showy of Forsythias. 2-3', 35c each.

Forsythia intermedia spectabilis (Showy Golden Bell)—This makes the most handsome specimen. Branches covered with rich golden flowers. A compact and shapely shrub. 2-3', 50c each.

Hydrangea arborescens grandiflora (Hills of Snow Hydrangea)—A medium growing shrub with a profusion of large, snowy white flowers from early June to September. Very hardy. 2-3', 50c each.

Hydrangea paniculata grandiflora—Bears huge pyramids of creamy white, pink tinged flowers. Begins blooming in mid-July and continues to October when other blooms are scarce. Not difficult to grow. Both shrub and tree forms—state which. 2-3', 35c each; 3-4', 50c each.

Hydrangea paniculata grandiflora—Bears huge pyramids of creamy white, pink tinged flowers. Begins blooming in mid-July and continues to October when other blooms are scarce. Not difficult to grow. Both shrub and tree forms—state which. 2-3', 35c each; 3-4', 50c each.

Selected New England Grown Fruits

APPLES

Our apple trees are inspected annually, for trueness to name, by Dr. J. K. Shaw of Massachusetts Fruit Growers Assn. Insist on receiving inspected apple trees for your own protection. There is no extra cost to you.

SUMMER

- Astrachan, Red—Crimson. Most popular all round summer apple.
- Gravenstein, Red—Solid red. Subacid. Excellent for cooking and eating.
- McIntosh, Early—McIntosh-like in color, flavor and texture.
- Yellow Transparent—Pale yellow, juicy and subacid. Trees bear young.

AUTUMN

- Macoun—Of the new apples, Macoun is the most popular. It is like McIntosh in color, flavor and quality but ripens a little later. 5c each extra.
- McIntosh, Red—Dark red. White, juicy flesh. A true favorite.
- Pound Sweet—Large, yellow sweet apple.
- Wealthy—Red. Large. Bears young. A good pollinizer for McIntosh.

WINTER

- Baldwin—Red blushed. The standard winter apple.
- Cortland—Large, dark red. Like McIntosh in flavor and quality. A good keeper.
- Delicious—Nearly covered with brilliant dark red. An apple of highest quality and attractiveness.
- Northern Spy—Striped red. A rapid grower and good bearer.
- R. I. Greening—Yellowish green. Unexcelled cooking apple.

CRAAPPLES

- Hyslop—Yellow, red cheeked. Ripens in October.
- Transcendent—Dark red. Ripens in September.

WE ARE THE DISTRIBUTORS IN NEW ENGLAND FOR RICHARD DELICIOUS, APPLE TREES. WRITE FOR DESCRIPTIONS AND PRICES.

VARIETIES

- Belle of Georgia—White with red cheek. Freestone. Late August.
- Carman—White, red cheek. Semi-freestone. Mid-August.

Cumberland—A large white of good quality. Dark red cheek. Nearly freestone. Mid-August. A new variety recommended to replace Carman.

Early Elberta—Yellow. Ripens a few days before Elberta and is similar to it in quality.

Eclipse—Dark red, yellow fleshed. Freestone. Late August. Texture firm and quality good. A seedling of Belle of Georgia.

Elberta—Large, yellow with red cheek. Freestone. Early September. Standard commercial peach.

Golden Jubilee—Large golden yellow, red blushed. Freestone. Mid-August. Best early yellow. This is an outstanding new peach which is now extremely popular.

J. H. Hale—Very large, yellow flesh, red cheek, freestone. Early September. Excellent in quality and flavor. The attractiveness of the fruit commands a fancy price.

Lizzie—Large, lemon yellow with nice red cheek. Freestone. Late September. A good shipper. Has little fuzz.

Nectar — Medium size. Yellow, crimson cheek. Semi-freestone. Ripens in mid-August following Greensboro. One of the hardest in bud.

Rochester — Large. Yellow. Good quality. Freestone. Mid-August.

South Haven—Large, yellow with blushed cheek. Freestone. Late August. New and popular, hardy and productive.

PEACHES Budded, Bear Young, Hardy . . Grow Your Own

Who doesn't like fresh home grown peaches? They need but little room, grow quickly and bear young. You will never know how good peaches can taste until you pick them fully ripened from your own trees. The price of just one bushel of peaches you buy, will pay for enough trees to bear many, many bushels of deliciously flavored peaches. Plant 16-18 feet apart.

The growing of peach trees has been a specialty with us for many years, and we use every care and precaution to have these trees healthy and true to name. We spare no expense to obtain the best seed and budding material.
Ripening periods are for average conditions in Connecticut.

Vines for Shade and Beauty

Vines radiate a mellow charm and give beauty with flowers, foliage or fruits. They provide shade, afford privacy and hide unsightly places. They take little space for themselves and are easy to grow. All vines are 2 year No. 1 unless described otherwise.

Ampelopsis quinquefolia (Virginia Creeper)—Useful for fences, rocky slopes and banks. The five-parted, dark green leaves turn bright crimson in fall. Rapid growing. Each 35c; 3 for 89c.

Ampelopsis tricuspidata (Boston Ivy)—Glossy dark green leaves which turn red in fall. Good cover for masonry. Foliage not attacked by insects or diseases, nor injured by smoke or dirt. Each 50c; 3 for \$1.39.

Sweet Autumn Clematis

Bignonia radicans (Trumpet Vine)—Orange-scarlet trumpet-shaped flowers which bloom nearly all summer. Provide with rich soil. 35c each; 3 for 89c.

Celastrus orbiculatus (Oriental Bittersweet)—Valued for its orange-yellow berries which open in the autumn showing crimson seed coverings. These remain attractive all winter and are splendid for decorating. 35c each; 3 for 89c.

Clematis paniculata (Sweet Autumn Clematis)—Masses of small, white fragrant flowers in September. Fine plant for trellises and porches. 35c each; 3 for 89c.

Clematis tangutica—Golden Clematis

—This unusual and handsome vine has golden yellow star-shaped flowers 1" across. It blossoms in June and again in the fall. The plant has added beauty of many long silvery hairs on seeds. Leaves bright green. 50c each; 3 for \$1.39.

Hedera helix (English Ivy)—Dark glossy evergreen leaves. One of the best plants for climbing on masonry. Give northern or western exposure. 2-3' staked, 60c each; 3 for \$1.68; 10 for \$5.00.

Hedera helix baltica—Baltic Ivy—The outstanding characteristic of this ivy is its resistance to cold weather. Its appearance is scarcely different from the usual English Ivy. It was introduced by the Arnold Arboretum where it has been tested and its worth proved. If you have admired the old English Ivy but have not been able to make it thrive, try this one. You will not be disappointed. Potted 18-24", 60c each; 3 for \$1.68.

Wisteria sinensis (Wisteria)—Grows rapidly in a loose twining manner. Flowers in May. Prefers deep, rich, moist soil. With white or lavender flowers. 50c each; 3 for \$1.39.

Hall's Japan Honeysuckle

Lonicera japonica Halliana (Hall's Japan Honeysuckle)—This is a familiar vine with dark, glossy, almost evergreen foliage. It bears fragrant yellow and white flowers from July to fall. It will grow in partial shade and is very effective when used as a porch screen or ground cover. Our plants are exceptionally fine this year. Strong plump roots are ready to "take hold" and make good growth at once. 35c each; 3 for 89c.

Hedges Protect and Beautify

BERBERIS THUNBERGI—JAPAN BARBERRY

Japan Barberry—Beautiful, familiar and ever useful. Heavy 3 year, well-branched plants with fine roots that will give immediate results.

12-18"	\$1.50 per 10; \$10.00 per 100
18-24"	2.00 per 10; 14.00 per 100
2-3'	3.00 per 10; 24.00 per 100

Box Barberry—A dwarf form not growing more than 20" high. 6-9", \$2.00 per 10.

Red Barberry—A red leaved form of Japan Barberry. Plant in full sun to obtain brightest color. 12-15", \$2.00 per 10; 15-18", \$2.70 per 10.

LIGUSTRUM—PRIVET

California Privet—Famous for its bright green foliage. Not reliably hardy north of Connecticut.

12-18"	\$.75 per 10; \$3.00 per 100
18-24"	.85 per 10; 5.00 per 100
2-3'	1.00 per 10; 7.00 per 100

Ibodium Privet—An upright bushy privet that will stand cold winters. Widely used in northern New England. Unexcelled for tall screens and formal hedges.

12-18"	\$.80 per 10; \$ 6.00 per 100
18-24"	1.00 per 10; 8.00 per 100
2-3'	1.50 per 10; 12.00 per 100

OTHER PLANTS VALUABLE FOR HEDGES

Acanthopanax (Aralia)—A shrub that will grow in shady places. 2 yr. 2-3'. 10 for \$2.00.

Spiraea Van Houttei—See Shrub Section.

Syringa vulgaris (Lilae)—See Shrub Section.

Thuja (Arboretum)—Write for prices.

Tsuga (Hemlock)—See Evergreen Section.

Barberry Makes a Most Compact and Easily Kept Hedge

How to Order

TERMS—Cash with order unless other arrangements are made. We will ship orders C. O. D., providing twenty-five per cent of total amount is sent with order. Interest at legal rates will be charged on overdue accounts.

ORDER EARLY—Order immediately, if possible. Late orders are subject to the hazards of being handled in a rush. Moreover, some varieties or sizes may be sold out, causing disappointment.

NON-WARRANTY—(1) If any nursery stock shall prove untrue to the label under which it is sold, provided notice and proper proof thereof are furnished by the purchaser to the seller, the seller shall, at the option of the purchaser, either refill that portion of the order, which was mislabeled, by another delivery of stock, or refund the purchase price; but in any case, we are not to be held responsible for a sum greater than the original selling price of such stock. (2) All sales or agreements of sale are made subject to shortage of nursery stock, fire, frost, floods, drought, or other causes beyond the control of the seller.

TRANSPORTATION CONDITIONS—All goods travelling by express or freight are sold F. O. B. point of shipment and travel at the purchaser's risk and expense. Parcel Post will be prepaid in New England, N. Y., N. J., Pa., Md., Del. and D. C.

GUARANTEE—Prices do not include any guarantee of growth. However, if any of the plants purchased from us this spring should fail to grow, notify us not later than July 1st, 1934, and we will replace the stock free. After July 1st, we will replace at half price.

CLAIMS—If there are any claims, they must be made on receipt of goods. Any error of ours will be promptly and satisfactorily adjusted. Claims made after ten days from receipt of goods, cannot be considered. We ship only best grades of stock and use great care in packing.

INSPECTION—Our nurseries are regularly and thoroughly inspected by the Connecticut Experiment Station and found apparently free from injurious insects and diseases.

LOCATION—Our nursery is located on the Boston Post Road, Route 5, three miles south of Meriden, two miles north of Wallingford. Buses of the New England Transportation Company pass our office, leaving the Hartford R. R. Station from the north and New Haven R. R. Station from the south every hour on the hour.
